

# Intuitive, remote visual instructions through AR technology **KDDI Vist@Finder**

## Stable

### Uninterrupted video streaming

Our unique technology provides steady, uninterrupted video streaming

## Visual

### Visual cues merge with reality through AR

Hand-drawn instructions from operator appear to worker  
Remote guidance to greatly reduce human error

## Secure

### Secure online transmissions

Uses Kciper-2 encryption, which is used by Japanese govt.  
High-speed encryption is processed 10x faster than AES

Get a real-time connection to the work site

Headquarters

AR: **A**ugmented **R**eality

- > Real-time instruction
- > Video and Phone recording

KDDI Vist@Finder allows video taken by smartphones, tablets, mobile PCs or other devices to be streamed remotely from the field over any kind of network simply, securely, and in high quality. Give instructions and check work progress with live video and audio, create audio and video records of on-site work, achieve hands-free operation using a wearable camera, and provide intuitive instructions through AR technology.

## Hands-free usage

A line-up of high-performance Smart Glasses
